**Forecast for Sunday 17 Oct 2021**

**Weather:** Persistent overnight rain wll soon start to die out this morning. Howevere this will leave widely poor conditions as thick cloud shrouds the hills and continues to bring some drizzly spells. Some brightness may develop towards the Nevis range by afternoon, but this is unreliable.

**Chance of cloud free mountain/hill tops above 800m:** 30% towards Glen Coe and the Nevis range this afternoon, otherwise virtually no chance.

**Visibility:** Extensive cloud above 300-400m throughout, perhaps lower across Loch Lomond and the Trossachs. Above this, visibility will be in the order of a few hundred meters making navigation very difficult. Some improvement is possible across the northwestern ranges with some reasonable views here through afternoon.

**Met Office Aberdeen Meteorologist's View**
Temperatures of only 5 Celsius above munro level with rain exacerbating this cold feel. Thick low cloud will lead lower, forested routes to be most rewarding.

**Forecast for Monday 18 Oct 2021**

**Weather:** Easterly or southeasterly winds will maintain dull conditions with extensive low cloud and patchy drizzle. Very limited scope for any cloud breaks, but these again most likely towards Glen Coe and the Nevis range. Outbreaks of rain will spread east through afternoon and any breaks which have developed will likely fill once again.

**Maximum wind:** East veering southeast 15-25mph, gusting up to 35mph on highest ground.

**Chance of cloud free mountain/hill tops above 800m:** 10%.

**Visibility:** Areas of cloud will persist above 300-400m across all ranges and low level visibility may be quite dull and hazy under this as spells of drizzle come and go. Visibility will be generally no more than a few hundred meters above this.

**Temperature:** **Glens:** Plus 12 Celsius.
**At 800m:** Around plus 7 Celsius.
**Freezing level:** Above summits.
